

OSX 10.9 IMAP Setup Guide

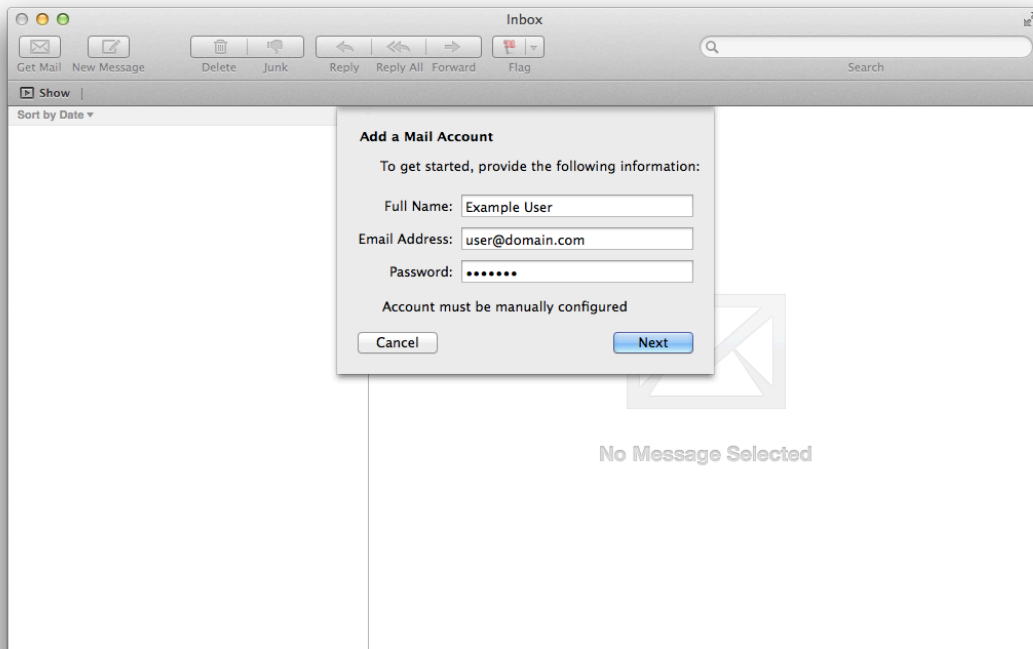

Open the **Mail** application on your system.

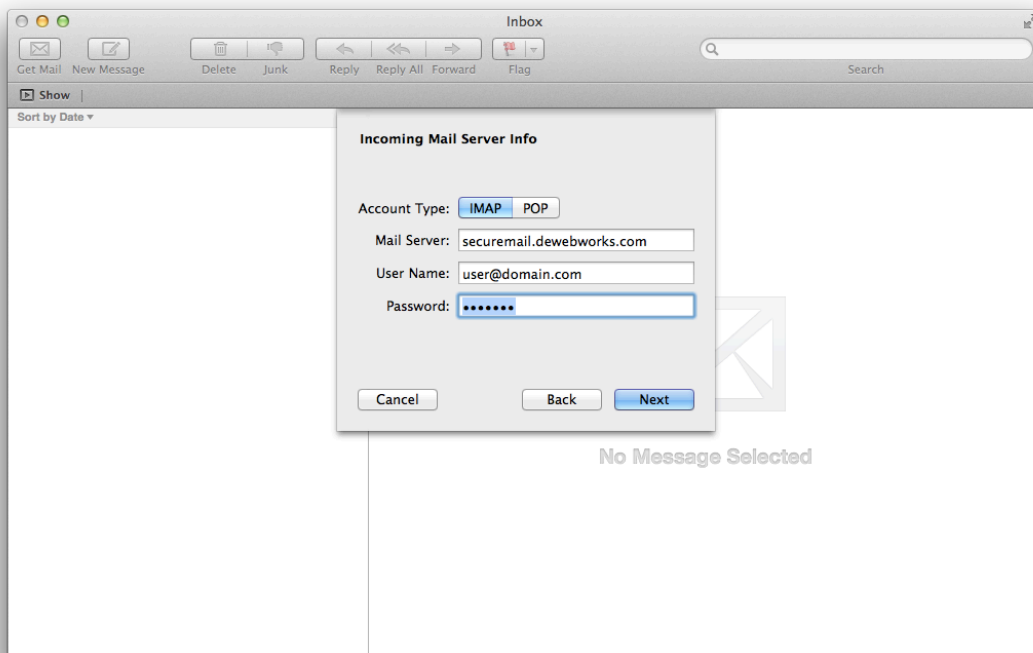

Select **Add Other Mail Account** from the options and click **Continue**.

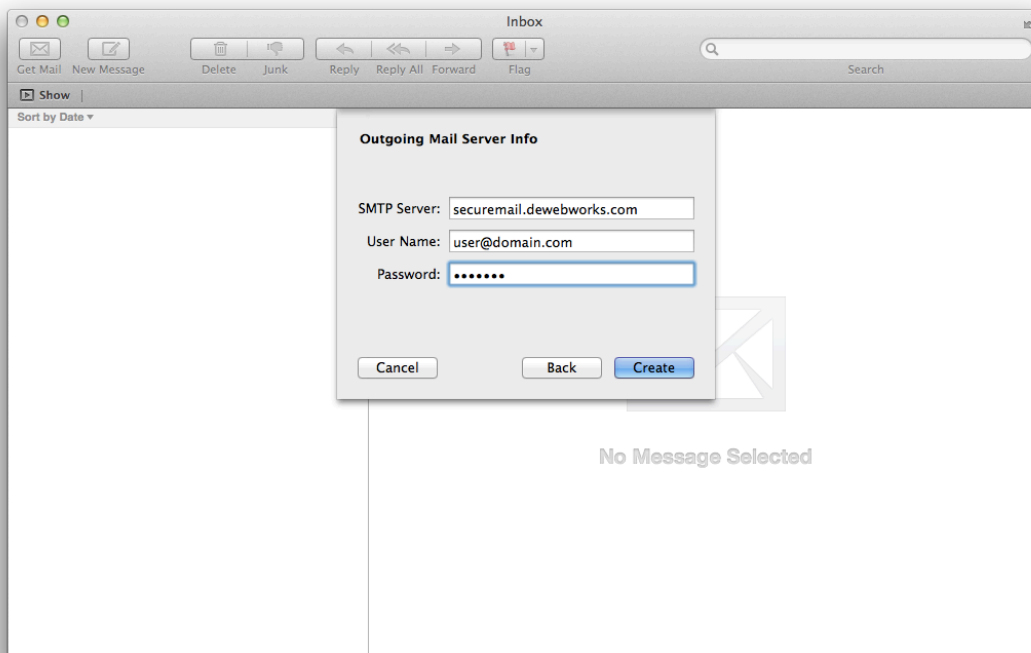

Enter your **Full Name**, **Email Address** and your email **Password**. Click **Create**.

If you see the notification **Account must be manually configured** click **Next**.

Select **IMAP** as the **Account Type**.
Enter **securemail.dewebworks.com** into the **Mail Server** field.
Enter your full email address into the **User Name** field.
Enter your email address password into the **Password** field.
Click **Next**.

Enter **securemail.dewebworks.com** into the **SMTP Server** field.
Enter your full email address into the **User Name** field.
Enter your email address password into the **Password** field.
Click **Create**.

Your settings will be verified and your account will be created.
